## "Strong and Well"

"I WISH you could know how much I am improved since taking the Cardui," writes Mrs. Nannie Brown, of Black Rock, Ark. "You wouldn't know me for the same weak invalid I was before I took it. At my . . . I had to keep off my feet or I would fall. I couldn't do my housework, and just got where I'd most as lief be dead as living. Some one told my husband of Cardui. He got

it for me and I took three bottles before I stopped—then off and on for the last three years just as a tonic. I saw a decided improvement after my first bottle. I used the three, and was able to do my work with ease, and now I sew for my family and for others. I am feeling fine, and strong and well."

Take Cardui! It may be just the medicine you need.

# CARDUI

The Woman's Tonic

### FINER FARMING.

By H. A. Powers, Co. Agent

A few days ago E. W. Maness reported to us that he had some hogs that were sick and others that were dead. The symptoms and other conditions were not such as to cause him to suspect cholera. We called on Dr. O'Connor, from the office of the State Veterinarian to come down and look them over and after he had made the usual diagnosis along with a post mortem examination of one that was sick, he pronounced it cholera. Serum was immediately ordered and administered by M. Attaway, a virus permit holder. NO MORE OF THE REMAINING THIRTY-ODD HOGS DIED. THE SIX OR SEVEN THAT HAD DIED WERE BURNED. Not only was this single farmer saved a heavy loss by getting in touch with the County Agent, but a source of infection for the neighboring farmers was removed and no doubt they were also benefitted. This farmer did just what every one should with dead animals. He burned them. This is about the only practical way to destroy disease germs.

Have you kept any sort of system of accounting during the present year?? Nothing short of an annual inventory and a record of receipts of the products sold should satisfy the farmer. In no other way can he be able to plan his farm operations to the best advantage. If you have not tried this plan during the past year let us suggest that you use it during 1923. We know of men that have found it valuable.

Our new calendars are here and we might also add that they are much better than they have ever been heretofore.

Irvin McAdams, J. E. Segerson and Reeder McKenzie are all enthusiastic for a big dog show at the County Fair next year. Why not?

The U. S. government has announced that it will sell 40,000 tons of nitrate of soda held in storage at the Old Hickory Plant at Nashville, Tenn. Bids will be accepted for lots of 100 tons. This is some of the purchases made during the war to be used in the manufacture of explosives. This county needs that much. Can we arrange to bid on it?

Are you helping to make your Community Club the best? There are many people who can say what should be done, but oh, how few, can lay plans to go ahead and then put them across. There are two kinds of criticisms; one is destructive; the other is constructive. Which is yours?

We are just back from a conference of all Extension workers in Tennessee, which was held in Knoxville, Tenn., the week ending Dec. 23rd. We gathered new ideas, our vision was enlarged, and the bigness of our job was more fully realized than ever. While we were discussing our failures and successes, and laying our plans for the future we thought how

few farmers get together and plan for the future development of their farms, communities and counties. Have you had a conference in your community this year? Have you ever had one? Is it not time that you were getting busy? Thousands are doing this in Tennessee, and they are forging ahead of those that are sitting still, too. WILL YOU BE LEFT BEHIND? We know of no movement which offers so much to the people for themselves than that of community organization.

Soon after you read the above the year 1922 will be rung out and 1923 will be a reality. Let us forget the hatreds and bitter things of the past and concentrate all of our energies on making life bigger and better for ourselves and others in 1923. After all we are rich to the extent of our happiness and poor in our misery whether we live in a mansion or a humble cottage.

### INDEPENDENCE

School is progressing nicely at this place.

Miss Clara Gardner was a guest of her sister, Mrs. J. C. Sikes last Friday.

Jim Gurley killed some fine porkers last week—three weighed 1,180.

Billie Thomas was in the Crawford Springs territory Thursday and Friday.

Miss Pearly Statton and Mr. Fee Jarred were married Thursday of last week. We wish them a long and happy life.

T. L. Tyler killed some fine hogs Thursday.

J. E. Sikes and family motored to Jackson Thursday of last week.

Mrs. Willie Lewis was the guest of Mrs. Terry last Friday.

Wyllie McMin and wife were in Jackson shopping last Thursday.

Several from here were at the Christmas tree at Poplar Springs Saturday night.

Jim Tyler and family were guests in the home of T. L. Tyler a few days ago.

J. E. Sykes and family were guests of Victor Sykes Monday.

### SAUSAGE AND SORGHUM LASSES.

From O. O. McIntire's "New York Day by Day" in the Memphis Commercial Appeal, we clip the following paragraph, and why should not sorghum on sausage be good as cranberries on turkey?

"George Bailey, a shrewd columnist, tells me that you can always interest readers with a bit of Epicurean description. So passing from fried oysters, I hail a delicacy that is offered on the breakfast menu of a Syrean cafe in Lexington Avenue. It is fried country sausage with a small pitcher of sorghum molasses on the side. One is supposed to pour the molasses over the sausage. Sounds musky, but it is delectable."

### MARKETING FARM PRODUCTS.

By T. F. Peck, Commissioner of Agriculture.

In Tennessee our soil and climate are so favorable that we can successfully grow practically everything necessary for our home consumption on our farms, and it is economy and good common sense to diversify our crops, at least to that extent. We should grow our own feed for our live stock and food for our tables, but we can simplify our marketing problem for our money crops if we as a community get our heads together and make a study of the lists of crops we can grow, and also make a study of market demands and shipping facilities, and select the crop or breed of live stock that is most promising and then concentrate our efforts to preparing our lands for their best yields.

If we decide on dairy products as our best source of revenue, then we want permanent pastures, we want leguminous forage, and we want grain. We must provide good storage for our feed, clean and comfortable housing for our cows, and have modern dairy equipment. We cannot afford to have poor milkers in our dairy herds. We must have sires from proven milk and butter cows. Our product must be of high quality, and attractively prepared for the market.

If we decide to produce beef cattle, or any other type of live stock, we can follow the same method of preparing our soils and largely grow the same kind of forage crops. We will need differently arranged housing for our live stock, and different character of rations, but thoroughness and close attention to detail is essential, no matter what line of agriculture we emphasize.

When our products are ready for market we can, by community co-operative effort have two essentials for securing the best buyers and best prices, and these essentials are QUALITY and QUANTITY OF PRODUCTS. Instead of each individual farmer looking out for chance customers, we can have a fixed place of delivery, and our sales manager, whose business it will be to keep in touch with market demands and conditions can dispose of the combined production of the community in the same time and at better prices than it would be possible for the individual farmers to secure for his single lot.

Manufacturers have sales managers to look after the sale and distribution of their products, and it is the business of the sales manager to know the condition of the market for his product, when the demand is best, and where conditions are best for marketing it. If there is no demand it is a part of his business to create one. For the market of manufactured products of the country, often a demand has to be created by the manufacturers.

We all know that developing markets for farm products has had very little attention or effort on the part of the farmers individually. In fact, as individuals we are at a disadvantage but collectively and cooperatively we can provide quantity and quality and our market agent can develop a demand for our product.

As to finding a person qualified for the place of market agent—what about the live wires who have been buying the products we have been dumping on the market at whatever price he would offer? Did it ever occur to you that you could make it more profitable for yourself and more satisfactory to him to employ him to market for you? If successful, he will realize, when you pool your products and grade and classify them, and sell more direct, that he has either to work for you or get out of business. Most of them will have to change their jobs. Why not retain the best one to serve you as your marketing agent?

Leaders in every other industry merchandise their products systematically and collectively, and farmers can do the same thing and get their fair share of the prices paid by the consumers.

While the solution of the marketing problems will not cure all the farmers' ills, it will put the patient in better condition to tackle and solve his other problems.

### ADMINISTRATOR'S NOTICE.

I have this day qualified as administrator of the estate of W. G. Hodgins, deceased. Any one having claims against the estate will file same with County Court Clerk twelve months from date or be ever barred. Anyone owing said estate will settle with me. This December 22, 1922.

W. C. CROOK,  
Administrator.

### ADMINISTRATOR'S NOTICE.

I have this day qualified as administrator of the estate of Mrs. Amanda Barber, deceased. All persons having claims against said estate will file same with the County Court Clerk, by February 15th, 1923, or be barred. All persons owing said estate will settle with me. This December 15th, 1922.

J. A. DEERE,  
Administrator.

### ADMINISTRATOR'S NOTICE.

I have qualified as administrator of John Maness, deceased. All persons having claims against said estate will file same with the Clerk of the County Court, 12 months from date or be barred. All persons owing said estate will settle with me. This December 9th, 1922.

R. L. MANESS,  
Administrator.

### ADMINISTRATOR'S NOTICE.

I have this day qualified as administrator of the estate of Hiram Guldredge, deceased. Any person having claims against the estate will file same with the County Court Clerk by Feb'y 1923, or be barred. Any person owing said estate will settle with me. This December 16th, 1922.

J. W. GULLEDGE,  
Administrator.

### TIMELY FARM THOUGHTS FOR JANUARY.

Specialists of the agricultural extension service, University of Tennessee, suggest the following timely farm thoughts for January:

#### Your Neighbor's Farm.

There is so much to learn about farming in any community that one man cannot hope to learn it alone.

Community experience is a valuable guide. "Mind your own business" by studying your neighbor's methods of running his farm, the kind and amount of his cash crops, the balance with live stock, his ability to "turn off" work and keep his men and teams profitably employed, his crops yields and quality of live stock, shape and size of fields, etc.

#### Balance of Live Stock and Crops.

The best general farmers are those who produce both livestock and crops, and balance the amount of live stock kept with the amount of feed produced. By this method not only can the fertility of the land be more easily maintained, but profits more likely secured. Farm surveys show that it pays to keep the maximum of live stock that the farm will carry. First calculate the amount of feed which the farm will produce this year, then plan on the amount of livestock to be kept.

#### Co-operative Marketing.

The farmers' major problem today is that of marketing his products. Co-operative marketing requires organization, standardize production; induced proper packing; minimizes transportation charges; and enables producer to reach better markets, all of which means more profit.

#### Cow Testing Associations.

Join a cow-testing association but if there is not one in reach of you keep a complete system of dairy herd records this year yourself, including records of production, cost of feed and not profit for each cow, as well as breeding records. You cannot make the money from your herd that you desire and which you are entitled to for your investment and time unless you have these records of your business. See your county agent or write the dairy specialist for free record blanks.

#### Junior Club Work.

The following clubs are being conducted in Tennessee for boys and girls between ten and eighteen years of age: Corn, Irish Potato, Sweet Potato, Legume, Garden, Canning, Cooking and Sewing, Pig, Baby Beef, or Purebred Calf, Junior Dairy, Sheep, Bee, Poultry. See that your boys and girls are members of one or more.

#### Egg Records.

Are you keeping a record of your flock? Do you know if your hens are paying for their feed? Do you get each day one-fourth as many eggs as you have hens? With our very mild winter your hens should be busy producing eggs; and if they are not, you should hunt the reason for their failure to lay and see if you cannot get them busy before spring, when every hen lays and eggs are cheap.

#### Rural Engineering.

Piric acid is used for stump and rock blasting and blowing out upon ditches in wet clay land. It is stronger than 60 per cent nitroglycerin dynamite and looks and acts much the same as dynamite. It costs 12 to 13 cents per pound in carload lots laid down. Place your order through your county agent and blow out stumps and rocks during the wet winter weather.

#### In the Home.

Join the home demonstration club at the beginning of the year. Purchase new household linens at the mid-winter sales.

#### Your Health.

Pneumonia occurs in all climates, at all seasons and affects all ages. It is more prevalent during the seasons of bad weather in winter and early spring. To protect against pneumonia, wear sufficient clothing, have plenty of fresh air in the sleeping room, avoid long exposure to cold, keep in a good physical condition. Pneumonia is a communicable disease.

### NON-RESIDENT NOTICE.

H. E. Graper, Administrator, of the Estate of J. W. Davis, deceased, and the Bank of Wildersville, Tenn., versus, Rena Autry and Husband, T. W. Autry, et al.

In the Chancery Court for Henderson County, Tennessee.

In this cause it appearing from the bill of the complainants, which is sworn to, that Henderson Davis, one of the defendants, is a non-resident of the State of Tennessee and resides in the State of Texas; and that T. A. Davis, Druella Davis and F. G. Davis, other defendants in the above-styled case are non-residents of the State of Tennessee and reside in the State of Missouri so that the ordinary process of law can not be served upon any of the defendants in the cause except Rena Autry and husband, T. W. Autry, who are resident citizens of Tennessee;

It is therefore ordered that publication be made commanding the said non-resident defendants to appear before the undersigned Clerk & Master at his office in Lexington, Tenn., on or before the first Monday in February, 1923, the same being a Rule Day of the said Chancery Court, and make defense to the bill filed in the cause or the same will be taken for confessed and the cause set for hearing ex parte as to them. And the said non-resident defendants are enjoined from disposing of or attempting to dispose of in any way, incumbering whatever interest they may have in the lands involved in this cause. It is further ordered that this notice be published for four consecutive weeks in the Lexington, Tennessee, Progress.

This, December 2nd, 1922.

W. V. BARRY,  
Clerk & Master.

H. E. Graper,  
Solicitor for Complainants.

### AID TO THE KIDNEYS.

Do Not Endanger Life When a Lexington Citizen Shows You the Way to Avoid It.

Why will people continue to suffer the agonies of kidney complaint, backache, urinary disorders, lameness, headaches, languor, why allow themselves to become chronic invalids, when a tested remedy is offered them?

Doan's Kidney Pills have been used in kidney trouble over 50 years, have been tested in thousands of cases.

If you have any, even one, of the symptoms of kidney disease, act now. Dropsy or Bright's Disease may set in and make neglect dangerous. Read this Lexington testimony:

Mrs. R. E. Hopper, Reid St., says: "I was as bad as anyone could be with kidney complaint. I wasn't able to be on my feet at all, my kidneys puffed up and my feet and ankles swelled and I couldn't rest comfortably. Finally, I began taking Doan's Kidney Pills and noticed relief from the first. Continued use permanently cured me."

NEARLY FOUR YEARS LATER, Mrs. Hopper said: "I have the same faith in Doan's Kidney Pills now as when I last endorsed them. I recommend Doan's at every opportunity."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Hopper had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

### TRUSTEE'S SALE OF LAND.

By virtue of authority under Trust Deed executed by Levi W. Wadley and wife, to me on August 8th, 1922, registered in Trust Book 36, page 230, Register's Office, Henderson County, Tennessee, to secure an indebtedness set out therein, and default having been made in payment thereof on demand of Beneficiary.

I will sell to the highest bidder, for cash, at the Southwest door of the Court House, in Lexington, Henderson County, Tennessee, on Wednesday, January 17th 1923, at 10:00 o'clock a. m., the real estate on which there is located a dwelling, located in the Fifth Civil District of Henderson County, Tennessee. Description of said property will be fully given on day of sale. The title to the said property believed to be good but I will sell and convey as Trustee only. Sold free from homestead and dower rights. Redemption and repurchase all being waived.

This December 13, 1922.

R. W. HALL, Trustee.

### CHAMBERLAIN'S COUGH REMEDY.

THE SOOTHING AND HEALING PROPERTIES OF Chamberlain's Cough Remedy, its pleasant taste and prompt and effective cures have made it a favorite with people everywhere. It is especially prized by mothers of young children for colds, croup and whooping cough, as it always affords quick relief and is free from opium and other harmful drugs. All Druggists.

### TAKING DESPERATE CHANCES.

It is true that many contract severe colds and recover from them without taking any precaution or treatment, and a knowledge of this fact leads others to take their chances instead of giving their colds needed attention. It should be borne in mind that every cold weakens the lungs, lowers the vitality, makes the system less able to withstand each succeeding attack and paves the way for more serious diseases. Can you afford to take such desperate chances when Chamberlain's Cough Remedy, famous for its cure of bad colds may be had for a trifle? All Druggists.

### When You Are Constipated.

To insure a healthy action of the bowels and correct disorders of the liver, take two of Chamberlain's tablets immediately after supper. They will not only cause a gentle movement of the bowels, without unpleasant effects, but banish that dull, stupid feeling, that often accompanies constipation. All Druggists.

### TO WHOM IT MAY CONCERN.

Beginning January 1, 1923, our general merchandising business at Crutcher, Henderson county, will be conducted on a STRICTLY CASH BASIS and we feel that the change will enable us to do so much better in prices for our customers that all will welcome and find profit in it. We feel grateful for all past business favors and trust that our change of policy will not cause the loss of a single customer.

This Dec. 18th, 1922.

Yours, for Prosperity in 1923,  
POPE BROTHERS.

### IN MEMORY.

Mrs. W. M. Green was born in Henderson county, July 24th, 1879. She was married to W. M. Green about the year 1900. To this union eight children were born—six girls and two boys. She was forty-three years, three months and twenty-eight days old.

Mrs. Green professed faith in Christ about 16 years ago and joined the Christian church at Juno and she was true to the faith until the end.

She was one of the old-time mothers, smooth in temper, quiet in manner and always looking to the interest of her family and her home.

Mrs. Green did not dread death except the separation. The writer was present when the end came and it was without any struggle—she quietly went to sleep in Jesus.

The community has lost a fine neighbor, the husband a real companion, the children a loving mother, the mother an obedient daughter. She leaves one brother, F. L. Hamlett, the reporter from this community to the county papers.

One of her boys had gone before her to the Glory world, but as stated she leaves one boy and six girls, husband, aged mother and brother, a host of friends to mourn their loss.

I would say to the weeping relatives that you will miss her on every hand, you will wait her coming but she is no more on this earth, but if you will live as she has lived you can meet her in that land where God with his own hand will wipe all tears away.

The funeral was conducted by the writer assisted by Brother L. Z. Jackson. The body was laid to rest in the Anderson Cemetery in the presence of a large assembly of people. The great floral offering by the friends showed how she was appreciated.

C. M. VERNON.

### CARD OF THANKS.

We take this method of thanking our friends and neighbors for the kindness shown us during the illness and death of our wife and mother. We extend our heartfelt thanks to all that helped in any way during our bereavement.

W. M. GREEN AND CHILDREN.
